

Individual contribution

For my team's project inception, mainly I have come up with the risks currently involved in the project and made the Risk Register. I also helped with writing and proofreading the team's Project Plan to double-check that we included and planned out what is needed. For the Analysis of Alternatives, I did not do the writing but I assisted my team member when they were not sure of something and wanted someone to check. Overall, I think I could have done more work for the inception phase as it is important to take into account certain measures early on.
