Title: Individual Contribution Report

Mainly for this project, I mainly did research on the analysis of alternatives and concluded the findings. I've wrote the comparison for relevant analysis and compared each other with each criterion. Besides, I've also written the architectural decisions. Our team did discuss about the decision made based on the analysis with some of our own opinion. I also did the proof-reading for the Project Plan to find out problems and give suggestions on the problems I've found. Besides, I also make sure that our Project Plan and Analysis of Alternatives follow the right track by constantly comparing with the rubric given. Overall, I am satisfied with my own work as well as my team's cooperation.
